

LEARNING JOURNEYS

Learning journeys are connected experiences that help our learners progress through a continuum of competencies from being a beginner to being proficient over their K-12 learning years. Choosing a right set of experiences at different points in time can be crucial to building the right skill set

To this child, the mouse is something on a desk and not an animal, loves technologies, and is aware of the latest gadgets and specs. The child aspires to change the world through new inventions in electronics, programming and be the future CTO of one of the top technology companies.
